

CITY RETREAT

Project Info

Opportunity: Adapting the iconic Palmolive Building from commercial office space to a luxury residential condominium development required a clear vision of the lifestyles and tastes that would choose this building as their residence.

Solution: This unit reflects a refined sensibility selected for a fictional client - a successful, urban bachelor. The aesthetic is distilled and unadorned. Clean lines define the space, maximizing natural light and a rich palette of materials, while honoring the enduring classicism of the Palmolive Building.

Value: Constructed long before the building renovation was complete, this model unit helped to convey the character, quality, and potential floor plan options to assist prospective buyers in their decisions.
