OUR PORTFOLIO

CONTACT US

For over a decade, Sound Specialists has designed, engineered, and installed custom residential and commercial systems that integrate audio, video, communications, custom theater environments, lighting, climate control and security.

We have carefully developed our business and our reputation for quality, innovation and professionalism with the successful completion of each project and, more importantly, the satisfaction of every client.

Ours is a company built on referrals, on the recommendations of clients who appreciate our personal service, client-based design approach and our exclusive focus on highly customized electronic systems.
